New Russia

It is 2070 now, our country has changed a lot. We faced with many challenges in order to make our country a good place to live.

• Job opportunities.

Newadays people can finally do what they like. They do not have to stay at work for extra hours. They are not worried about losing their place, because everyone is priceless for companies. Moreover, the salary of workers depends on themselves. More product they made, higher salary.

• Education

The system of education has also changed. Today students can choose more suitable subjects for them, so they will be more educated in them and could find a job faster. Moreover, every student has a chance of getting in exchange program. Our universities integrated with foreign ones. It is a great opportunity for learning other countries culture and language.

• Environment.

We have also succeeded in some environmental problems. Our government found a way of decreasing the number of air pollution, so vehicles now produce less harmful gases in atmosphere. Also there are a lot of different projects that helps us to save the environment.

• Free time

Now people have more free time and more ways of spending it. We have a lot of centres connected with hobbies, for example dance clubs, art clubs and others. Moreover, there are many places where you can get together with your friends or family and have a good time.

I can say that Russia is a great place for living now.
