This report is aimed to show weak places in our school recreation sphere. The problem is, that our school museum is not used effectively by the students. Recently, we have found out a lot of problems that caused such a low activity.

I will rapidly give you a description of our museum. It is located on the fourth floor, in the last classroom of the school. It is always closed because the opening hours are too short. Also, there is a limitation of visitors, no more five students. The classroom is really small. Every exposition is under a thick glass, so no one can even touch the historic items.

Firstly, It is not used by the students because it is too far to go. You should go through the whole building to reach the point. Secondly, students cannot visit the museum whenever they want. Thirdly, we cannot contact with exponents. It is boring just to look at them.

In a result of a recent discussion, I would like to say that museum should work longer, for about five hours. The entrance should be on the first floor. The exponents should be interactive. Also, we should put students awards of the present time too, ~~because~~ in order to make an engagement higher. I suppose that ~~(an)~~ advertisement will be useful too, because our school is the oldest one, so as our museum.

I am sure that our recommendations will increase public access to the museum.
